ABOUT ME

Datacenter Technician with hands-on NOC experience monitoring server, hardware, and network performance, and resolving incidents through direct troubleshooting and escalation. Skilled in client communication and report generation, with practical networking expertise gained through a self-built home lab covering VLANs, static and dynamic routing, and router-on-a-stick configuration. Currently pursuing a Bachelor's degree while growing a career in datacenter operations and network engineering.

EXPERIENCE

Datacenter Technician
APR 2026 – PRESENT

Silver Lining Data Center · Kamalpokhari, Kathmandu

- Monitor server, hardware, and network performance, proactively identifying issues before they escalate
- Troubleshoot technical issues independently; escalate complex cases to senior technicians when needed
- Communicate directly with clients and provide clear updates throughout the process
- Generate and maintain detailed reports on monitoring activities, incidents, and resolutions

Datacenter Technician Intern
JAN 2026 – APR 2026

Silver Lining Data Center · Kamalpokhari, Kathmandu

- Assisted in monitoring server and network performance under senior technician supervision
- Learned incident escalation procedures and NOC operational workflows

E-commerce Website (PHP) – Project
DEC 2022 – JAN 2024

- Built a fully functional e-commerce website using PHP with Stripe payment integration

Google Web Story Design – Project

- Designed a Google Web Story for a client project, focused on visual storytelling
